EXECUTIVE SUMMARY

CONSULTANT OVERVIEW AND TOP PRIORITIES

OVERALL ASSESSMENT

A concise view of what is working and where the biggest opportunities are.

The website currently scores 71/100 (C). The audit indicates a needs work technical baseline with the strongest opportunities in performance efficiency, search clarity and trust signals. This report is generated from full structured audit JSON data, not screenshots, so hidden and dynamic page details are included.

BIGGEST STRENGTHS

STRENGTH	Structured data detected, improving machine readability.
----------	--

BIGGEST WEAKNESSES

RISK	Performance gaps are likely reducing conversion quality, especially on mobile.
RISK	Missing image ALT text weakens accessibility and image SEO coverage.
RISK	Repeated HTML validation errors indicate template-level technical debt.
RISK	Multiple security headers are missing, reducing browser hardening.

TOP 3 PRIORITIES

PRIORITY 1	Resolve high-frequency validation and metadata issues in the shared templates.
PRIORITY 2	Improve mobile Core Web Vitals by optimizing render-blocking assets and media.
PRIORITY 3	Close trust and accessibility gaps: security headers, ALT text and semantic labels.

EXECUTIVE SUMMARY

CONSULTANT OVERVIEW AND TOP PRIORITIES

BUSINESS IMPACT SNAPSHOT

Why this audit matters beyond technical compliance.

WHY IT MATTERS	Technical quality influences discoverability, trust and conversion momentum.
SEO IMPACT	Improved indexing quality and richer eligibility for search features.
CONVERSION IMPACT	Faster pages and clearer intent signals increase lead completion probability.
USER EXPERIENCE IMPACT	Cleaner interactions reduce friction for users on mobile and desktop.
DIFFICULTY	Medium
ESTIMATED TIME	1 to 2 weeks phased implementation

SEO & ACCESSIBILITY

STATUS, EXPLANATION AND REMEDIATION GUIDANCE

ITEM	STATUS	EXPLANATION	HOW TO FIX
Title	Needs work	Shima Marandi Somatic Yoga & Embodied Movement in Wien (56 chars)	Keep one unique title per page between 50 and 60 characters with clear intent.
Meta description	Needs work	In meiner Arbeit als Somatic Movement & Yoga Teacher stelle ich eine Verbindung zwischen dem her, was wir in uns finden und dem, was außerhalb des Körpers liegt. Mit Yoga, Embodiment, Somatics, Somatic Yoga Nidra, Achtsamkeit, Berührung, Klang und Musik. Dieser Ansatz nimmt Dich auf eine Reise in die Welt der Wahrnehmung und ermöglicht Dir eine Heimkehr in den jetzigen Moment durch Deinen Körper. (399 chars)	Use 140 to 160 characters with user intent, value proposition and target keywords.
Canonical	Good	https://www.shima-marandi.com	Add a canonical URL in the head for each indexable page.
Robots meta	Missing	No robots directive found.	Set explicit index/follow directives where needed.
Sitemap	Good	sitemap.xml is available.	Generate sitemap.xml and submit it in Search Console.
Robots.txt	Good	robots.txt is available.	Publish robots.txt with sitemap reference and safe crawl directives.
Open Graph	Needs work	Open Graph fields are incomplete.	Add OG title, description, image and URL for key templates.
Twitter Card	Needs work	Twitter Card tags are incomplete.	Add summary_large_image card, title, description and image tags.

SEO & ACCESSIBILITY

STATUS, EXPLANATION AND REMEDIATION GUIDANCE

Schema	Good	1 valid JSON-LD blocks, WebSite	Add Organization/WebSite/WebPage schemas and validate JSON-LD syntax.
Language	Good	de-AT	Set the HTML lang attribute to the primary content language.
Hreflang	Optional	No hreflang data detected in current scan.	If multilingual, add reciprocal hreflang tags for all translated versions.

ACCESSIBILITY CHECKS

Core semantic and interaction coverage.

ITEM	STATUS	EXPLANATION	RECOMMENDATION
Landmarks	Good	Main and navigation landmarks detected.	Ensure one main landmark and a clear nav region in layout templates.
Labels	Good	0 labels may not map to form controls.	Connect each label with a for/id pair or wrap controls correctly.
Buttons	Good	0 buttons may not have readable labels.	Provide visible text or aria-label values for all action buttons.
ARIA	Good	0 potential invalid ARIA usage patterns.	Keep ARIA roles and attributes valid and semantically necessary.
Contrast	Not available	Contrast data was not included in this scan.	Run contrast checks for all text/background combinations at template level.
Keyboard navigation	Not available	Keyboard flow data was not included in this scan.	Verify tab order, focus indicators and escape patterns for overlays and menus.

W3C VALIDATION

GROUPED RECURRING VALIDATION ISSUES

VALIDATION SUMMARY

Duplicate warnings are grouped to focus on root causes.

W3C SCORE 0/100

CRITICAL ERRORS 173

WARNINGS 30

UNIQUE GROUPED ISSUES 8

ISSUE TITLE	COUNT	EXPLANATION	HOW TO FIX
Trailing slash on void elements has no effect and interacts badly with unquoted attribute values.	26	Repeated validation patterns usually point to shared template or builder output.	Review invalid or duplicate attributes in templates and component output.
CSS: Parse Error.	10	Repeated validation patterns usually point to shared template or builder output.	Fix the root template pattern once and re-run validation to remove repeated messages.
Element "style" not allowed as child of element "div" in this context. (Suppressing further errors from this subtree.)	4	Repeated validation patterns usually point to shared template or builder output.	Check invalid nesting and ensure all required opening and closing tags are present.
The "type" attribute is unnecessary for JavaScript resources.	4	Repeated validation patterns usually point to shared template or builder output.	Review invalid or duplicate attributes in templates and component output.
Attribute "elementtiming" not allowed on element "img" at this point.	3	Repeated validation patterns usually point to shared template or builder output.	Review invalid or duplicate attributes in templates and component output.

W3C VALIDATION

GROUPED RECURRING VALIDATION ISSUES

Bad value "true" for attribute "defer" on element "script".	2	Repeated validation patterns usually point to shared template or builder output.	Review invalid or duplicate attributes in templates and component output.
Bad value "http://www.w3.org/2000/symbol" for the attribute "xmlns" (only "http://www.w3.org/2000/svg" permitted here).	2	Repeated validation patterns usually point to shared template or builder output.	Review invalid or duplicate attributes in templates and component output.
Element "div" not allowed as child of element "button" in this context. (Suppressing further errors from this subtree.)	2	Repeated validation patterns usually point to shared template or builder output.	Check invalid nesting and ensure all required opening and closing tags are present.

W3C BUSINESS IMPACT

Validation quality supports robustness and maintainability.

WHY IT MATTERS	Template validation errors often cascade into multiple UX and accessibility regressions.
SEO IMPACT	Cleaner HTML can improve crawl interpretation and rendering reliability.
CONVERSION IMPACT	Reduced UI breakage risk improves user trust and form completion rates.
USER EXPERIENCE IMPACT	Fewer structural errors means more consistent behavior across browsers.
DIFFICULTY	Medium
ESTIMATED TIME	2 to 6 hours depending on template complexity

SECURITY & HARDENING

HEADER COVERAGE AND REMEDIATION GUIDANCE

SECURITY HEADER	STATUS	IMPORTANCE	EXPLANATION	HOW TO FIX
Strict-Transport-Security (HSTS)	Missing	High	Forces HTTPS to reduce downgrade and hijacking risks.	Enable HSTS with a safe max-age and includeSubDomains when ready.
Content-Security-Policy (CSP)	Missing	High	Reduces XSS risk by restricting script and asset sources.	Start with report-only mode, then tighten allowed sources iteratively.
X-Frame-Options	Missing	Medium	Prevents clickjacking via unauthorized iframe embedding.	Set to DENY or SAMEORIGIN based on embed requirements.
X-Content-Type-Options	Missing	Medium	Prevents MIME type sniffing for safer resource handling.	Set header to nosniff on static and dynamic responses.
Referrer-Policy	Missing	Medium	Controls referral data exposure between origins.	Use strict-origin-when-cross-origin for balanced analytics and privacy.
Permissions-Policy	Missing	Medium	Restricts browser feature access such as camera and geolocation.	Disable unused permissions and allow only required origins.

SECURITY BUSINESS IMPACT

Hardening improves confidence and reduces compliance risk.

WHY IT MATTERS	Security headers are low-visibility but high-value protection layers.
SEO IMPACT	Safer and more trustworthy websites support stronger quality signals over time.
CONVERSION IMPACT	Visible trust signals and reliable browsing improve lead confidence.

SECURITY & HARDENING

HEADER COVERAGE AND REMEDIATION GUIDANCE

USER EXPERIENCE IMPACT	Users are less likely to encounter blocked content or exploit-driven disruptions.
DIFFICULTY	Medium
ESTIMATED TIME	1 to 3 hours in most hosting setups

IMAGES & MEDIA EFFICIENCY

MODERN FORMATS AND DELIVERY QUALITY

IMAGE FORMAT DISTRIBUTION

WebP and AVIF reduce payload size and speed up rendering.

BEFORE AND AFTER EXAMPLE

CURRENT	JPG or PNG assets for heavy visual content.
RECOMMENDED	WebP or AVIF with responsive sizes and lazy loading.

IMAGES & MEDIA EFFICIENCY

MODERN FORMATS AND DELIVERY QUALITY

IMAGE OPTIMIZATION IMPACT

Media optimization is often the fastest route to speed gains.

WHY IT MATTERS	Large images commonly dominate total page weight.
SEO IMPACT	Faster image delivery supports Core Web Vitals and mobile SEO resilience.
CONVERSION IMPACT	Lower wait times improve scroll depth and form starts.
USER EXPERIENCE IMPACT	Sharper responsive images reduce layout shifts and visual delay.
DIFFICULTY	Easy to Medium
ESTIMATED TIME	30 minutes to 1 day

TECHNOLOGY STACK

DETECTED STACK PROFILE AND CONFIDENCE LEVELS

PRIMARY TECHNOLOGY

Main platform influences implementation path and delivery speed.

MAIN TECHNOLOGY Squarespace

DETECTED TECHNOLOGIES

Rendered as compact confidence badges for fast scanning.

SQUARESPACE | WEBSITE BUILDER | 100% HIGH

AI READINESS

HOW AI AND SEARCH SYSTEMS MAY UNDERSTAND THE SITE

AI READINESS SCORE

Machine-readable quality across content, semantics and structure.

AI readiness score

72/100

The page has some generative-search readiness gaps that can be improved with better structure and metadata.

SCHEMA QUALITY	1 valid blocks / 1 total
CONTENT QUALITY	Word count 396, text-to-html 0%
SEMANTIC HTML	95/100 semantic accessibility score
INTERNAL LINKING	29 links, 4 empty anchor issues
FAQ READINESS	FAQ schema not detected

AI and modern search systems rely on consistent semantics, schema, clear entities, and internal context. Improving these signals increases the probability that content is interpreted correctly in rich search and AI-assisted discovery experiences.

RECOMMENDATIONS

PRIORITIZED IMPLEMENTATION CARDS

CRITICAL

Fix these first to reduce technical and business risk.

CRITICAL

ADVANCED | 1 TO 2 DAYS

Add alt text to images

Why it matters	5 image or images are missing alt text.
Business impact	High direct impact on search trust, technical quality or conversion outcomes.
Expected improvement	Fewer technical blockers and measurable uplift in site quality signals.

CRITICAL

ADVANCED | 1 TO 2 DAYS

Improve security headers

Why it matters	Add missing headers like Content Security Policy, Strict Transport Security, X Frame Options and Referrer Policy.
Business impact	High direct impact on search trust, technical quality or conversion outcomes.
Expected improvement	Fewer technical blockers and measurable uplift in site quality signals.

CRITICAL

ADVANCED | 1 TO 2 DAYS

Fix W3C HTML validation errors

Why it matters	The W3C validator found 173 critical error or errors and 71 warning or warnings. These issues can affect browsers, JavaScript and screen readers.
Business impact	High direct impact on search trust, technical quality or conversion outcomes.
Expected improvement	Fewer technical blockers and measurable uplift in site quality signals.

RECOMMENDATIONS

PRIORITIZED IMPLEMENTATION CARDS

IMPORTANT

High-value improvements after critical remediation.

IMPORTANT

MEDIUM | 2 TO 4 HOURS

Page title looks strong

Why it matters

The title is present and within a good SEO range.

Business impact

Moderate to high impact on discoverability and engagement quality.

Expected improvement

Better crawl clarity, UX and conversion readiness.

IMPORTANT

MEDIUM | 2 TO 4 HOURS

Improve the meta description

Why it matters

Current description length is 399 characters. Aim for 120 to 160 characters.

Business impact

Moderate to high impact on discoverability and engagement quality.

Expected improvement

Better crawl clarity, UX and conversion readiness.

IMPORTANT

MEDIUM | 2 TO 4 HOURS

Add LocalBusiness schema

Why it matters

The page shows local business signals, so LocalBusiness schema can improve local search clarity.

Business impact

Moderate to high impact on discoverability and engagement quality.

Expected improvement

Better crawl clarity, UX and conversion readiness.

RECOMMENDATIONS

PRIORITIZED IMPLEMENTATION CARDS

RECOMMENDED

Foundational improvements for long-term resilience.

RECOMMENDED

EASY | 30 TO 90 MINUTES

Improve heading structure

Why it matters	Multiple H1 headings found: 4. Heading jumps from H1 to H3.
Business impact	Incremental improvement that compounds site quality over time.
Expected improvement	Cleaner baseline and lower risk of regressions.

RECOMMENDED

EASY | 30 TO 90 MINUTES

Convert legacy images to modern formats

Why it matters	The page still uses legacy image formats that can be improved with WebP or AVIF for smaller files and better performance.
Business impact	Incremental improvement that compounds site quality over time.
Expected improvement	Cleaner baseline and lower risk of regressions.

RECOMMENDED

EASY | 30 TO 90 MINUTES

Improve mobile performance

Why it matters	Mobile performance is 40/100. This should be a top priority.
Business impact	Incremental improvement that compounds site quality over time.
Expected improvement	Cleaner baseline and lower risk of regressions.

RECOMMENDED

EASY | 30 TO 90 MINUTES

Core Web Vitals weighted score

Why it matters	The weighted Google score is 73/100. Mobile results are weighted more heavily than desktop.
Business impact	Incremental improvement that compounds site quality over time.
Expected improvement	Cleaner baseline and lower risk of regressions.

BENCHMARK, TIMELINE & PRIORITY

MATRIX

EXECUTION PLANNING AND COMPETITOR CONTEXT

COMPETITOR BENCHMARK

Relative positioning based on available competitor audit data.

CATEGORY	YOUR SCORE	COMPETITOR	GAP
Performance	73	99	-26
SEO	48	76	-28
Accessibility	98	100	-2
Security	57	14	43
Content	100	100	0
AI readiness	72	100	-28

TIMELINE AND EFFORT

Execution buckets by estimated delivery time and required effort.

30 minute fixes Title/meta cleanup, missing ALT text, basic robots/canonical checks. EASY
2 hour fixes Header policy updates, image compression rollout, priority template validation fixes. MEDIUM

BENCHMARK, TIMELINE & PRIORITY MATRIX

EXECUTION PLANNING AND COMPETITOR CONTEXT

1 day fixes

Core template refactor for recurring W3C issues and richer structured data coverage.

ADVANCED

Developer required

CSP strategy, rendering path optimization and architecture-level UX hardening.

ADVANCED

PRIORITY MATRIX

Impact versus implementation difficulty.

QUADRANT	FOCUS	EXAMPLE ACTIONS
High impact / easy	Do now	ALT text, title/meta tuning, robots and sitemap fixes.
High impact / hard	Plan sprint	Template refactors, Core Web Vitals optimization, CSP rollout.
Low impact / easy	Batch later	Minor copy polish and non-critical metadata refinements.
Low impact / hard	Defer	Deep architectural changes with low short-term business upside.

WHAT YOU DID WELL

BALANCED STRENGTHS AND CREDIBILITY MARKERS

STRENGTH HIGHLIGHTS

A balanced report should preserve what is already working.

STRENGTH	Structured data detected, improving machine readability.
STRENGTH	The audit includes structured evidence from full JSON output, improving decision confidence.
STRENGTH	Desktop and core technical signals provide a workable baseline for faster improvements.

FINAL CONSULTANT SUMMARY

ACTION SEQUENCING AND 90-DAY ROADMAP

CONSULTANT SUMMARY

What is working well, what needs attention, and what to prioritize first.

WHAT IS WORKING WELL?	Structured data detected, improving machine readability.
WHAT NEEDS ATTENTION?	Performance gaps are likely reducing conversion quality, especially on mobile.
WHAT SHOULD BE FIXED FIRST?	Resolve high-frequency validation and metadata issues in the shared templates.
EXPECTED BENEFIT	Higher technical quality, stronger search visibility and better conversion readiness.

90-DAY WEBSITE IMPROVEMENT ROADMAP

Phased implementation plan for practical execution.

Week 1: Quick wins Resolve metadata essentials, ALT gaps, robots/sitemap issues and critical missing headers.	EASY
Weeks 2-4: Medium-impact improvements Address mobile speed bottlenecks, grouped W3C issues and semantic accessibility fixes.	MEDIUM
Months 2-3: Strategic enhancements Expand schema coverage, refine conversion journeys and execute AI-readiness improvements.	ADVANCED

Need help implementing these improvements?
